

go beyond ILS

**Boost your capacity by a third. Reduce your costs by half.
With SmartPath™**

Simply put, Honeywell SmartPath Ground Based Augmentation System (GBAS) is the future of precision landing. Requiring only one system to cover an entire airport, SmartPath delivers substantial cost savings over ILS, recouping acquisition costs in just two years. SmartPath increases airport capacity, serves airports where ILS is not an option, decreases air traffic noise and reduces weather-related delays—while greatly reducing maintenance costs, inspection fees and total cost of ownership. The value equation for next-gen precision landing has never been so simple. Learn more today.
